ESG integration Project

In today's world, ESG principles go beyond buzzwords. They are the guiding responsible practices. Annapurna operates in resource-constrained settings and by embracing ESG, it drives sustainable development while upholding financial inclusion. It partners with CareEdge Advisory to integrate ESG into their operations and investments.

The step of ESG adaptation of the organization includes:

- Initial ESG assessment on existing GAP analysis and Peer benchmarking

In a recent GAP analysis, the organization excelled in two-thirds of the indicators, surpassing industry standards, reflecting its commitment to sustainability. The assessment highlighted room for improvement in areas such as energy and GHG emissions, sustainable financing, workforce diversity, product innovation, and ESG oversight.

- Materiality Assessment & Stakeholder Engagement
- ESG metrics determination & strategy formation
- Standardize reporting & performance monitoring
