| 13 | TOTAL HQLA | | 255.50 |
| 14 | TOTAL NET CASH OUTFLOWS | | 194.27 |
| 15 | LIQUIDITY COVERAGE RATIO (%) | | 131.52% |

Qualitative Disclosure on LCR

As per Reserve Bank of India guidelines, all deposit-taking NBFCs, regardless of their asset size, and non-deposit-taking NBFCs with assets of Rs.5,000.00 crore and above, are required to maintain a liquidity coverage ratio (LCR). This ensures they hold enough high-quality liquid assets (HQLA) to withstand a 30-day period where cash outflows increase to 115% and cash inflows decrease to 75%. The LCR is determined by averaging daily observations over 90 days.

I. Main LCR drivers and evolution of the contribution of inputs in LCR

Calculation over time - The numerator of LCR is driven by the quantum and composition of High-Quality Liquid Assets (HQLA). The denominator of LCR is driven by various components of the stressed cash flows. The details of each line items considered are mentioned below.

- a) **Unsecured and secured wholesale funding** -- All the principal and interest falling due from the secured and unsecured funding raised through various instruments like Term loans from Bank/FI/NBFC, ECBs, NCDs and Sub-debt during the next 30 days is considered here.
- b) **Other contractual funding obligations** – Other Contractual funding obligations includes the loan amount sanctioned but not disbursed and the off-balance sheet (Direct assignment outflows) to be paid during the next 30 days.
- c) **Other contingent funding obligations** – Other Contingent funding obligations includes the amount due to be hypothecated against the new fund raised for the next 30 days. The statutory dues payable within the next 30 days are also considered under other contingent funding obligations.
- d) **Inflows from fully performing exposure** - Principal and Interest payment to be received in the next 30-day period from Standard Clients out of total loans and advances outstanding is considered here.
- e) **Other Cash Inflows** – All the investment in the FD and the mutual fund maturity falling due within the next 30 days period is considered here. Apart from this the retained earnings portion from the off-balance sheet position to be received in the next 30 days is also considered here.

II. Intra period changes and changes over time – The company endeavors to maintain a healthy level of LCR at all points of time. The LCR table shows the movement of changes in each component over the reporting period.

III. Composition of HQLA - The company has kept sufficient cash and cash equivalents which are regarded as High Quality Liquid Assets (HQLA) in the form of bank balances and Investments in T-Bills. The components of HQLA for the Quarters is as under: -

| Particulars | For the year ended March 31, 2024 (weighted average) | For the year ended March 31, 2023 (weighted average) |
|--|---|---|
| <i>Cash in hand</i> | 582 | 222 |
| <i>Balances with Banks in current accounts</i> | 24,234 | 48,355 |
| <i>T-Bills/G-Sec</i> | 10,446 | - |
| Total | 35,263 | 48,577 |

- IV. Concentration of funding sources** - The Company has a diversified funding profile in the form of term loans from Bank, NBFC, FIs, Non-convertible Debentures and External Commercial Borrowings which are long-term in nature. The Company is a non-deposit taking NBFC and hence, reporting nil deposits. The Company has a wide array of investors / bankers who have funded the Company through various funding instruments.
- V. Derivative exposure and potential collateral calls** – The company didn't indulge in derivative trading activities. However, the company has entered into derivative transactions to hedge its balance sheet liability exposure and has accordingly considered in its computation process.
- VI. Currency mismatch in LCR** – AFPL computes LCR in one single currency. Though AFPL has raised funds through external commercial borrowings, all the exposures are completely hedged and AFPL doesn't have foreign exposure in any other components.
- VII. Other inflows and outflows in LCR calculation that are not captured in LCR** – All the components of inflows and outflows that are captured in the LCR calculation are mentioned above.

1. Unweighted value has been calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows).
2. Weighted values have been calculated after the application of respective haircuts (for HQLA) and stress factors on inflow and outflow.

*LCR has been calculated using simple average of daily observations of data points.

ANNAPURNA FINANCE PRIVATE LIMITED**Public Disclosure on Liquidity Risk (March 31, 2024)**

(Pursuant to RBI circular RBI/2019-20/88 DOR.NBFC (PD) CC. No.102/03.10.001/2019-20 dated November 04, 2019)

1. Funding Concentration based on significant counterparty (both deposits and borrowings)

| Number of Significant Counter Parties | Amount (In Lakhs) | % of Total Deposits | % of Total Liabilities |
|---------------------------------------|-------------------|---------------------|------------------------|
| 33 | 5,81,600 | NA | 78.89% |

2. Top 20 Largest Deposits

There are no deposits accepted by the company as the company is non-deposit taking NBFC.

3. Top 10 Borrowings (amount in lakhs and % of total borrowings)

| Amount in Lakhs | % of Total Borrowings |
|-----------------|-----------------------|
| 1,53,336 | 22.21% |

4. Funding Concentration based on significant instrument/products.

| Name of the instrument/Product | Amount in lakhs * | % of Total Liabilities |
|-----------------------------------|-------------------|------------------------|
| Term Loans from Banks | 1,42,719 | 19.40% |
| Term Loans from FI | 51,091 | 6.95% |
| Non-Convertible debentures | - | 0.00% |
| CCD | 15,000 | 2.04% |
| CCPS | - | 0.00% |
| Term Loans from NBFC's | - | 0.00% |
| External Commercial Borrowings | 30,052 | 4.09% |
| Sub Debt (unsecured) - Debentures | 10,000 | 1.36% |
| Sub Debt (unsecured) - Term Loans | - | 0.00% |
| Total Borrowings | 2,48,862 | 33.83% |
| Total Liabilities | 7,35,645 | |

5. Stock Ratios for the Quarter.

| Stock Ratios for the quarter | | | |
|---|------------------------------|-----------------------------|------------------------|
| Particulars | as a % of total public funds | as a % of total liabilities | as a % of total assets |
| Commercial Papers | 0 | 0 | 0 |
| Non-convertible debentures (Original maturity of less than 1 year) | 0 | 0 | 0 |
| Other Short-term liabilities | 0 | 0 | 0 |

6. Institutional set-up for liquidity risk management

The Company's Board of Directors has the overall responsibility of management of liquidity risk. The Board decides the strategic policies and procedures of the Company to manage liquidity risk in accordance with the risk tolerance limit as decided by the board.
